

**The Friends of the Carmel Valley Library
First Saturday ZOOM Presents**

Saving California's bumble bees

**Dr. Hollis Woodard,
assistant professor
of entomology at UC Riverside**

**An overview of our state's beautiful Bumble bee,
the things that threaten them, and how we can protect them**

As one of our most economically and ecologically important groups of pollinators. Her work primarily uses bumble bees as a model system for addressing a variety of topics, which include the role of nutritional mechanisms in bee social evolution; and the roles that food availability and nutrition play in native bee decline. The influence of nutritional landscapes on bee behavior, development, and population dynamics:

**Sat. Jun 5
10:15AM**
